

SHOW OFF YOUR ECONOMIC IQ.
CUT YOUR PRINTING COSTS
UP TO 30%.*

Here's an important strategy a lot of companies don't think about: **cutting costs in their printing environments.**

The materials in this folder can help you understand how you can generate cost savings of up to 30% by addressing your printing needs more effectively. Consolidating your current printers, copiers, scanners, and fax machines into some well-placed HP multifunction devices is certainly a good start. Our HP solution can also help you optimise your printing infrastructure, streamline the management of your printing and improve your workflow—boosting productivity and cost-efficiencies even more.

Bring the same discipline to your printing environment that you bring to the rest of your company.

It's a smart move, and Computech will help you make it.
