Computech's Infrastructure Services Portfolio for Microsoft Products

Computech offers a full lifecycle of solutions and provides end-to-end consulting, deployment and management services addressing areas such as **Private and Public Cloud, Email Migration and Email Management, Document Management and Collaboration, Hyper V Virtualization services, Microsoft SQL Databases and Windows OS Migration from XP, Windows 7 and 8 to Windows 10.**

The services are summarized as below:

1. Cloud Services

a. Virtualization and Private Cloud Services

Begin your journey to the Cloud through a Private Cloud implementation. Computech will help transform your data center to offer true infrastructure service capability through our Virtualization and Private Cloud Services based on Microsoft's Data Center Services Framework. Microsoft Private Cloud solutions are built on Windows Server and System Center technology.

b. Office 365 Migration Service

Migrate your existing business environment, including your email platform and collaboration services, to Microsoft's Public Cloud offering – Office 365. Computech's Office 365 Migration Service is a proven 6-phase approach designed to help enterprises migrate their legacy messaging and collaboration infrastructure to Microsoft's Cloud-based Office 365 solution with zero data-loss and zero downtime during migration.

c. Azure Backup as a Service

Windows Azure Backup helps protect server data against loss and corruption by enabling backup to offsite cloud storage in Windows Azure. By extending Windows Server Backup, Windows Azure Backup enables you to use familiar tools to configure, monitor, and manage backups to the cloud similarly to how your backup to local media.

2. Desktop Solutions & Services

a. Windows 10 Migration

Unleash the power of Windows 7, 8 and 10 through our migration services. Computech ensures seamless migration to the Windows 7, 8 and 10 environments through services covering Strategic Assessments, Windows 7, 8 and 10 Remediation and Migration.

3. Windows Server Solutions & Services

a. Active Directory Migration Service

Thinking of making the switch to Microsoft Active Directory to streamline the user experience on your network. Computech Offers AD migration services by making the migration as seamless as possible, regardless of the directory type you are migrating from such as Active Directory 2007, 2010, 2012. The migration process will preserve all the user accounts along with the rights and data that are associated with them while starting you out with a clean and streamlined directory structure.

b. Microsoft Hyper-V Virtualization Solutions

With Microsoft Hyper-V, it is now easier to take advantage of the cost savings of virtualization through Windows Server 2008 R2 to Windows Server 2016. Computech will assist in optimizing your server hardware investments by consolidating multiple server roles as separate virtual machines running on a single physical machine, efficiently running multiple different operating systems in parallel, on a single server, and fully leveraging the power of x64 computing. The Hyper V Live Migration and clustering features will also enable you to migrate running VMs from one physical computer to another without any interruption of services.

4. Email Services

a. Exchange 2016 Migration Service
Upgrade from legacy messaging platforms such as Exchange 2003, Exchange 2007, Exchange 2010, Exchange 2013 and Lotus Notes to the latest messaging platform Exchange 2016. Computech's Exchange 2016 Migration service ensures zero data-loss with no disruption to your business.

b. Email Management Service
Computech's Messaging Management service follows a full ecosystem management based approach that allows end-to-end ownership of operations management of the messaging landscape.

5. Collaboration Services

a. SharePoint / Skype for Business
Computech Offers deployment and configuration services for SharePoint and Skype for business. This product will Provide employees with an integrated environment to effectively manage their Documents centrally, Automate Line of Business applications, promote collaboration across messaging applications and provide a voice and video conferencing platform. Computech engages in a strategic consulting engagement, which draws up an enterprise Unified Communications roadmap, designs, implements, and manages the Unified Communications and Collaboration environment.

6. Management Solutions & Services

a. Microsoft System Center Deployment Services
Benefit from Microsoft's System Center suite of services to manage IT environments across traditional datacenters, private and public clouds, client computers, and devices. Computech's proven 5-phase approach to deploying System Center Products gives organizations the benefit of having a partner with experience in rapidly designing and deploying solutions for large enterprises.

b. Microsoft SQL Deployment and Consolidation Services
Microsoft SQL Server is a powerful database management system (DBMS) that is easy to use, easy to deploy, self-maintaining, self-tuning and cost Effective. Computech's Engagement is designed to provide the Customer with an end-to-end analysis, Deployment and mapping of their SQL environment, taking into consideration current deployment, usage and licensing data. Computech offers Microsoft SQL Deployment Services and enables companies to consolidate Existing SQL environments which specifically translates into improved cost efficiency from higher utilization of resources, standardization and improved manageability of the IT environment
